RISK MANAGEMENT SYSTEM'S REVIEW ON THE EFFECTIVENESS

During the reporting period, the implementation of Telkom's risk management system was effective in managing various risks to support every policy and business process at Telkom and its subsidiaries. Telkom uses applications (tools)/risk management information systems as supporting infrastructure for the effectiveness of risk management systems, including:

- 1. Generic Tools Enterprise Risk Management Online (ERM Online) which is used by all units to manage Risk Assessment.
- 2. Specific Tools for certain risk management such as:
 - a. Fraud Management System (FRAMES) application is used as an early detection system for the possibility of Customer Fraud.
 - b. i-Library application managed by the Service Operation Division and to be used to manage the documentation system of the Integrated Management System.
 - c. SMK 3 Online application managed by the Security & Safety Unit for Health and Safety documentation management.
